

Altium Professional Services

Your Vision, Our Mission

The Altium Professional Services team is your trusted partner dedicated to ensuring you get the most from the Altium Agile solution. The team offers expert guidance, tailored implementation, and continuous support to help meet your business goals and technical objectives. By deeply understanding your requirements and aligning your goals to the Altium Agile solution, our Professional Services team ensures seamless adoption, quick time-to-value, and maximum return on your investment. — Your Vision Is Our Mission...Success, Engineered Together

The Value of Professional Services

Altium Professional Services ensure that you achieve tangible benefits from the adoption and use of the Altium Agile solution. This is accomplished through deep understanding, personal engagement, innovative problem-solving, and tailored implementation. Our services align the Altium Agile solution and its technologies to your critical business goals, ensuring long-term value and success.

Our service offerings include strategic assessments, full-service or collaborative implementation, product customization, specialized integration, hands-on or on-demand training, data migration, and enhanced support. These services are designed to meet specific organizational needs, tackle design challenges, streamline workflows, and offer specialized knowledge, ultimately helping ensure your ROI.

Underwriting Your Success

The Altium Professional Services organization ensures no gaps exist between the Altium Agile solution and your technical expectations and business outcomes. The result is that your investment in and adoption of the Altium Agile solution delivers measurable results and foster long-term success.

Professional Consulting Services

Altium Strategic Business Advisors work intimately with you to understand your design environment, electronics design challenges, and product development processes. This understanding enables us to diagnose challenges, tailor solutions, and provide strategic direction that aligns the Altium Agile solution with your technical requirements and critical business goals.

Implementation Services

Implementation services provide best practices, data migration, integration, and design expertise to ensure seamless deployment and adoption. A dedicated solution architect and implementation manager streamline deployment, manage risks, and optimize performance, minimizing disruption and accelerating time-to-value.

Support Services

Support services with Technical Account Management ensure a strong and reliable relationship. Technical Account Managers act as a trusted advisor while the Premium Support team provides readily available, highly technical product expertise for the Altium Agile solution.
